about

I am a self-taught web and applications designer with a passion for creating unique and user-friendly designs. I have a keen eye for detail and a strong understanding of UX principles that I use to create designs that are both visually appealing and functional. I am constantly learning new techniques to stay ahead of the curve and keep my designs fresh and up-to-date.

experience

UI/UX DESIGNER

Arab National Bank. | 2021

My role is to ensure that the experience is intuitive, modern, and user friendly. I am responsible for analyzing user feedback and usage data, and making adjustments to the design to improve the overall experience. Additionally, I develop prototypes and design documents to ensure the development team understands the user's needs and expectations. Finally, I provide guidance to the team on best practices in visual design, interaction design, and user experience design.

UI/UX DESIGNER

Eriyada System. | 2020

I have experience in creating and implementing user interface designs, wireframes, storyboards, and prototypes. Additionally, I have conducted usability testing for websites and mobile applications to identify user experience problems and areas of improvement. I have used DevOps to test web and tablet applications to ensure they meet business requirements and user stories. I am familiar with Agile methodology and have experience in helping teams achieve their goals. Created physical and prototype designs and functions for websites and mobile applications. And testing and analyses web and tablet on DevOps to face the requirement and user story and assurance quality of software to reach and achieve business goals.

GRAPHIC DESIGNER

Cbceimamu. | 2019

As an intern at Cbceimamu, I was responsible for designing graphic content for daily posts, as well as developing graphic design projects such as logos, advertisements, and infographics. I was also able to successfully increase viewer engagement in social media by 75%. In addition, I was able to troubleshoot and fix technical problems in the system.
